

ADDENDUM FOR PRINT PROJECTS

ADDENDUM II: PRINT

TECHNICAL SPECS

We ensure that files are created to your specifications provided in the initial documents. Should files or colors need to be re-shuffled or re-worked in any way to comply with your printers' requirements, we are more than happy to do so. However, should significant changes need to be made we may need to bill these separately.

PRINTERS

Depending on your project we may work with a printer on your behalf. Starcresc is not a printer, and we cannot be responsible for any mishaps with the printer or the quality of the final print. Due to the nature of printing, once the file has gone to the printer, changes or revisions are not possible. The printer may provide us with a sample, but unless asked otherwise, we will review it internally for quality and give the final approval for printing on your behalf.

MATERIALS

Certain materials will serve each use-case scenario depending on the final use of the product. Please ensure we are made aware of its intended use so we can suggest the proper materials.

ADDITIONAL COSTS

There are some additional costs to print projects. You should be aware of (1) costs of papers or materials, (2) the costs of stamps, packaging, shrink wrap or other materials to distribute the project, (3) cost of distribution method which may involve a packager or hand-delivery person, (4) cost of printers which may or may not include all of the aforementioned, (5) costs to acquire lists for use with mailers, (6) any other associated fees.

Unless otherwise noted, Starcresc is not responsible for any of these services or any associated fees.
